

## WILDFLOWER GARDEN MOIST HABITAT

Beginning in 1982, the NC Botanical Society and The Garden Club of North Carolina, Inc. have selected a native wildflower as Wildflower of the Year. These gardens contain all the past wildflowers and are divided into moist (garden 4) and dry (garden 6) habitats. In our Dry Habitat, our handcrafted Turk's Cap Lily lives and a bejeweled bird bath invites local fauna to stop in for a drink. artisan-crafted plaque is mounted on logs from Lucius Morse's original Chimney Rock cabin.

1. Witch Alder, *Fothergilla*
2. Swamp Sunflower, *Helianthus augustifolius*, 2007
3. Great Blue Lobelia, *Lobelia siphilitica*, 1993
